**\*\*\*\*\* FOR IMMEDIATE RELEASE\*\*\*\*\***

**INCIDENT:** Help needed in identifying remains of cold case victim

**DATE:** April 9, 2012

The Marietta Police Department Detective Division is asking the public for assistance in identifying a victim whose remains were discovered almost two decades ago. A recent DNA test of the remains, conducted by the FBI, revealed that the victim was not that of a missing Cherokee County woman who disappeared in 1992.

The Marietta Police Department has followed up on all possible leads to discover the possible identity of the remains of an unknown female which were unearthed by construction equipment on Scufflegrit Road in June of 1993.

The victim is described as a white female possibly born between 1957-1962. She is around 5'03" to 5'06" tall and weighing between 100-120 pounds. The victim was discovered wearing a white halter top, a scarf with an orange & pink diamond print design, sleeveless tan jacket, elastic band slacks, a 24" strand of white beads with imprinted blue flowers separated by gold color metal beads and multi colored bead earrings.

Marla Lawson, a GBI Forensic Artist constructed a forensic facial reconstruction of what the victim may have looked like at the time of her death. Anyone with any information is urged to call the Marietta Police Department Tip Line at 770-794-6990 or Lieutenant Steve Campisi at 770-794-5367.
